SUBJECT INDEX

Compiled by Mary Purton

Acetylcholine receptor, nicotinic 368
Acetylcholinesterase 353
Achatin I, occurrence of D-amino acids 481
Acid phosphatases 105
Actin cytoskeleton and signal transduction 438
Adenylate cyclase-associated protein and the actin cytoskeleton 438
ADP-ribosyl cyclase, sequence similarity to CD38 antigen 495
β_2-Adrenergic receptor signalling pathway 37
AIDS vaccine: how antibodies block HIV infection 191
Aldoases, horizontal gene transfer 489
Alkaline phosphatases 105
Alkyl hydroperoxide reductase 183
Allosteric control of glycogen phosphorylase 66
D-Amino acids, post-translational modification 481
Aminoacyl-tRNA synthetases, structural and functional relationships 159
AMP regulation of glycogen phosphorylase 66
Ankyrin-like repeats in NF-κB 135
Antibody-assisted entry of Epstein–Barr virus into epithelial cells 239
α1-Antitrypsin, structure of 49
AP-1 protein and signal transduction pathways 418
Apolipoprotein B mRNA editing 77
Asthma and atopic dermatitis (Letter) 22
Atherosclerosis and macrophage scavenger receptors 141
Atopic dermatitis and asthma (Letter) 22
ATP, role in bacterial protein translocation 219
ATP-dependent glutathione S-conjugate export pump 463

Bacteriorhodopsin, structural studies using electron spin resonance 448
Band-shift analysis of protein–protein interactions 246
Blood pressure regulation by nitric oxide 399
Bovine pancreatic trypsin inhibitor folding pathway 257
Brefeldin A 325
Broad-complex protein and vaccinia virus 213
Butylcholinesterase 353

Cadherin sequence similarity in c-*ret* 468
Calcineurin 408
Calcium
and inositol 1,4,5-trisphosphate receptors 403
and light adaptation of photoreceptors 307
role in activation of protein kinase C 414
Calcium-activated protein kinase 408
Calcium regulation
of MARCKS binding 438
of nitric oxide production 399
Calcium signalling
and insulin secretion 388
and phospholipase activation 393
Calmodulin binding to MARCKS protein 438
Calmodulin-regulated protein phosphatase (PP2B) 408
Cancer cells and episialin expression 359
Carboxyesterases in plants 82
Catalytic RNA examined using *in vitro* genetics 89
CD4–gp120 binding during HIV infection 191
CD38 antigen, sequence similarity to ADP-ribosyl cyclase 495
Cell cycle 281
Cell cycle regulation
involvement of MAP kinases 233
by the retinoblastoma protein 312
of ribonucleotide reductase 119
Cellular adhesion and cell-membrane associated mucins 359
Ceramide 393
Chaperone machines 295
Chlorophyll synthesis, role of glutamyl-transfer RNA 215
Chloroplast mRNA editing 4
Cholinesterases 353
Chondroitin sulphate 340
Chromatin condensation
and H1 dephosphorylation 93
in sea urchin sperm 223
Chromatin structure and transcription 23,187
Ciliary neurotrophic factor receptor 378
Clathrin-coated pits, as molecular filters in protein trafficking 27
(Letters) 211,212
Closed circular DNA and protein-induced structural changes 7
Clusterin 154
Colony stimulating factors 286
Connective tissues and oxygen supply 340
Coronavirus E1 protein, Golgi localization signals 2
CREB/ATF protein and signal transduction pathways 418
Cyclic AMP
and CREB regulation 418
role in regulation of the β_2-adrenergic receptor 37
Cyclic AMP-dependent protein kinase 408
Cyclic GMP-dependent protein kinase 408
Cyclin-dependent protein kinases and MAP kinases 233
Cyclins 281
and the retinoblastoma protein 312
Cytidine deaminase, role in Apo B RNA editing 77
Cytochrome oxidase subunit IV, transport into mitochondria 453
Cytochromes *c*, c_1 and b_2, transport into mitochondria 453
Cytochromes P-450 in plants 82
Cytokine receptor superfamily 72,378
growth hormone receptor 169
Cytokine stimulation of nitric oxide activity 399
Cytotactin 228

D1-polypeptide of photosystem II, role in photoinhibition 61
Deoxyribonucleotide production 119
Dermorphin, occurrence of D-amino acids 481
Developmental control by homeobox genes 277
Diacylglycerol generation
by phospholipases 393
and protein kinase C activation 414
Directed mutation 207
Disulphide-bonded intermediates in BPTI folding 257
DNA damage inducibility of ribonucleotide reductase 119
DNA helical repeats, experimental determination of (Letter) 250
DNA packaging in sea urchin sperm 223
DNA polymerase ε, a role in DNA replication? 55
DNA–protein complexes, structure 7
DNA repair genes and nuclear targeting sequences (Letter) 347
DNA replication, possible role of DNA polymerase ε 55
DNA structure, protein-induced changes 7
DNA viruses consist of fused portions of cellular genes 213
DnaJ heat shock protein module in malaria parasites 129
Dolichol-phosphoryl-mannose, role in biosynthesis of GPI anchors 470
Down-regulation of the β_2-adrenergic receptor 37
Drug delivery using liposomes 203
Duchenne muscular dystrophy 289

Dynamin 300
Dynein 300
Dystrophin 289

Electron spin resonance 448
ELP-1 ER protein 325
End4 mutants of Golgi stability 325
Enzyme catalysis studied by protein engineering 292
Epiglycanin 359
Episialin 359
Epitope libraries 241
Epstein–Barr virus, entry into epithelial cells 239
ERD-2 ER protein 325
Erythrocyte (avian) chromatin condensation and H5 phosphorylation 93
Erythrocyte protein p55, a membrane-bound guanylate kinase? 99
Erythropoietin 286
Escherichia coli three-dimensional model (Letter) 22
Ets domain-binding motif in the serum response element 423
ets gene family 251
Evolution by acquisition: horizontal gene transfers 489
Evolutionary conservation of soluble inorganic pyrophosphatase active site 262
Evolutionary history of globin genes 486
Evolutionary mechanisms in bacteria 207
Evolutionary studies of ribonuclease P structure 178

FASTA protein sequence comparison program (letter) 60
Federation of Asian and Oceanian Biochemists 53
Ferrous superoxide dismutases, horizontal gene transfer 489
Fibroblast growth factor receptor 374
Flavin-linked peroxide reductases 183
Flippase mechanism of the multidrug transporter 18
fos gene activation and signal transduction pathways 418
c-*fos* serum response element 423
Fourier-transform infrared spectroscopy 328
Fresco–Alberts–Doty model 177
Fructose-bisphosphate aldolases 110
Fullicin, occurrence of D-amino acids 481

G-protein-coupled receptors, regulation of 37
G proteins 383
  Golgi transport 87
  G_q subfamily 502
$GABA_A$ receptor 368
Galactosyl transferase, Golgi localization signals 2
Globin genes, introns and evolutionary history 486
Glucagon and glucagon-related peptides 388
Glucokinase regulation and nomenclature (Letter) 59
Glucose phosphate isomerase, horizontal gene transfer 489
Glucose-induced insulin secretion 388
Glucose-transporter proteins, regulation in insulin-responsive cells 197
N- and *O*-Glucosyltransferases in plants 82
Glutamate receptor ion channels, mRNA editing 4
Glutamate receptors 368
Glutamine synthetase, horizontal gene transfer 489
Glutamyl-transfer RNA 215
Glutathione S-conjugate export pump, ATP-dependent 463
Glutathione transferases in plants 82
